

Visualization: The Impact of Police Training on Racially Biased Policing

Adara Rosenbaum

Research Question

What if any impacts do police trainings have on how police officers perceive Black people and how might these trainings affect outcomes of interactions between police officers and Black civilians?

Theory and Hypotheses

- Theory

Theory and Hypotheses

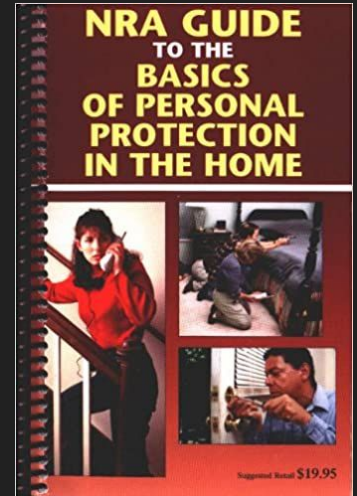

- Theory
- Definition of visualization

Theory and Hypotheses

- Theory
- Definition of visualization
- Three hypotheses

Hypothesis 1: Visualization, Racial Bias, and the NRA

- Experiment 1: Experimental group racial resentment survey
- People in the United States tend to associate Black men with crime
- Cognitive effects of visualization

Hypothesis 2: Visualization in Police Training

- Experiment 2: Comparison between NRA training and police training documents
- Connection between the NRA and the police
- Police trainers discuss the importance of visualization

Visualization exercises in police training

Here's why it's important to incorporate visualization in your training

Hypothesis 3: Visualization and Racial Bias in the Police

- Experiment 3: Experimental group shooting response activity
- Assumptions from H1 and H2
- Main point of comparison

Discussion and Conclusion

- Significance
- Further research
